## CAREER OBJECTIVE

Young and dynamic web designer and developer with a keen interest in expanding skill set through an undergraduate program in Computer Science and Engineering (CSE). Passionate about creating engaging online experiences and eager to leverage current expertise in web design to excel in roles that value creativity, innovation, and continuous learning.

## BEST PROJECTS

### Homyz (JavaScript)

- Got the design from dribbble and developed it with my own touch.
- Used the swiper.js for the beautiful sliders.
- Designed a beautiful floating menu bar and optimized the page for mobile devices.

[Source Code](#)

### Magna Dokan (JavaScript, PHP)

- Build the full CMS for a website which provide free pdf.
- Designed & developed the frontend by my own without any framework or libraries.
- Developed the backend with pure PHP & My SQL and created an admin panel to manage the website easily.
- Implemented caching for better performance in cheap shared hosting.

### Nike (Tailwind CSS)

- I took inspiration from a Nike landing page and developed it with Tailwind.
- Because of great understanding of Vanilla CSS, it was easy to work with Tailwind.
- This design is fully responsive for all the devices.
